With this certificate, you have an annual yield opportunity of 10.30% as well as the option of early redemption. If the underlyings quote at or above the starting value on one of the annual valuation dates, (early) redemption is affected including interest of 10.30% per year of term. If at least one of the underlyings quotes below the starting value on one of the annual valuation dates, the term extends by another year – up to a maximum of 4 years. In case of no early redemption after 4 years and if at least one share quotes below the termination level at the final valuation date, capital protection of 100 % is affected at the end of term.

How the certificate works

On the first valuation date the starting values of the underlyings are fixed. On the annual valuation date, the prices of the underlyings are compared to the starting value. If the underlyings are at or above the starting value, the certificate is redeemed (early) at the defined termination price. The maximum possible redemption is limited by the maximum amount.

100 % capital protection at the end of term

In case the closing price of at least one underlying quotes below the termination level at the the final valuation date, the capital protection of 100% applies at the end of term. In this case, 100% of the nominal value is paid out on the maturity date.

The payout profile applies at the end of the term

- 100% of the nominal amount is secured by the capital protection at the end of term.
- The maximum redemption is limited by 141.20% (maximum amount).
- Loss of value due to inflation is not covered by the capital protection.

During the term
